

Set Expire Date

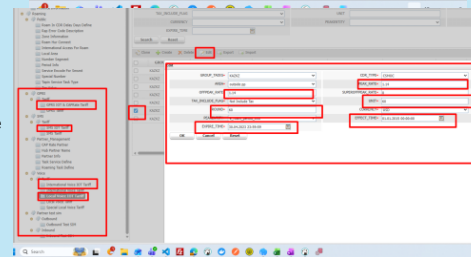

PRM=>Maintain operation=>Maintain general reference data=>update in [local voice IOT, international voice IOT(voice IOT have MT, MO, MO international and international zone 5), SMS IOT, GPRS IOT]=>set offpeak rate, peak rate, round, unit, expire date, effective date.Eg. you do it in APR so expire date is in the last day in APR. after update please double check on it. **Note: the important that we need to check careful are rate charge before tax, effective date and expire date.**

Screen Shoot after set Expire Date Past in MOP working Documents

Example of step todo after set expire date

Set New Effective and Expire date

PRM=>Maintain operation=>Maintain general reference data=>update in [local voice IOT, international voice IOT(voice IOT have MT, MO, MO international and international zone 5), SMS IOT, GPRS IOT]=>set offpeak rate, peak rate, round, unit, expire date, effective date.Eg. you do it for Next moth you set effective at the start of month and expire date you can set like 31-12-2037. and after update please double check of it. **Note: the important that we need to check careful are rate charge before tax, effective date and expire date**

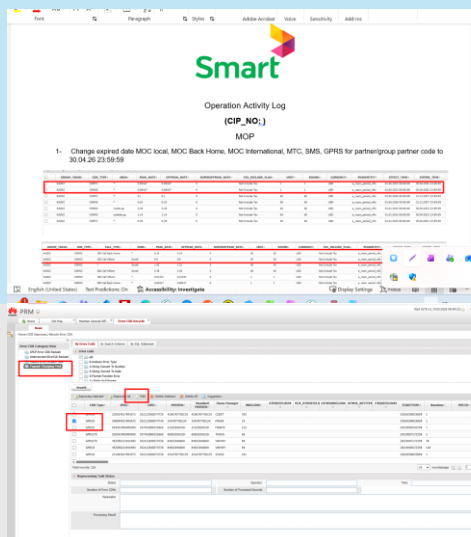

STEP 1

DO MOP

If all Tadig code in the same Group (like: LLA Group, BB group.... For example

Do it one time

Screen Shoot after set new Effective and Expire Date Date Past in MOP working Documents

Example of step todo after set new effective date and new expire date

STEP 2

DO PRE-TEST

Home=>Search=>Recycle
Error CDR

Choose check box that you want to edit new(like :
MO,MT,SMS,GPRS,...)=>edit=>change
imsi,msisdn,stand dart msisdn, change other tell num if
required, set new effective date=>click on okay=> chck
check box on the record that already update => reprocess
selected=>refresh.

STEP 3 Query in PRM DB(Test bed)

```
SELECT
@tt.H_MANAGER_GROUP,
@tt.HOMEMANAGER,
@tt.HOME_CALL_FLAG,
@tt.CDR_TYPE,
@tt."ZONE",
@tt.IMSI,
@tt.MSISDN,
@tt.OTHERTELNUM,
@tt.STARTTIME,
@tt.DURATION,
@tt.TOTALBYTE,
@tt.CHARGE_UNIT
```

[illegible]
